

Invitation to submit Marie Skłodowska-Curie or Petar Beron postdoctoral fellowship applications

The Center of Plant Systems Biology and Biotechnology (CPSBB) invites postdoctoral scientists from all over the world to apply for postdoctoral fellowships with host organization CPSBB (Plovdiv, Bulgaria) (www.cpsbb.eu).

CPSBB is currently the leading plant science center in Bulgaria, with strong focus on molecular stress physiology, plant cell biotechnology, plant metabolomics, bioinformatics, and vegetable breeding.

Postdoctoral researchers who wish to apply for Marie Skłodowska Curie fellowships or Petar Beron Fellowships are invited to submit their CV and a short (two pages) description of the topic they propose to develop until August 31, 2022, by e-mail to: secretary@cpsbb.eu

As these fellowships are very competitive, the candidates for the postdoctoral fellowships must have at least two scientific articles in medium or high IF journals (>5 and >10, respectively) as first authors.

The selected candidates will be invited to prepare a competitive proposal with the host institute. CPSBB will offer the successful postdoctoral applicants modern molecular biology equipment, state-of-the-art metabolomics facilities, and spacious plant growth facilities.

More information about these fellowships can be found here:
